

Building resilient and intelligent business networks is the transformative opportunity of our time.

At LevelPlane, we are creating the first **AI-Agentic Business Network** with a single mission: to build a global, intelligent procurement ecosystem.

Our Focus

We combine enterprise-tailored workflows, network intelligence and Swarm Of AI Agents into one seamless platform. Starting with **tail spend management**, we're solving an urgent procurement challenge while laying the foundation for a future of optimized collaboration and growth.

Our Impact

LevelPlane is more than a platform; it's a trusted network that leverages AI-powered insights to connect businesses, reduce inefficiencies, and foster resilience. From **cost optimization to proactive risk management**, we empower enterprises and SMBs alike to thrive in an increasingly complex global trade landscape.

Our Commitment

Headquartered in San Jose and operating globally, we're assembling a lean and talented team of engineers, product innovators, and strategists dedicated to redefining procurement and business networks.

LevelPlane is actively forging partnerships and inviting enterprises, consortiums, and SMBs to revolutionize their procurement processes and elevate member experiences. If you share our vision, **let's shape the future together.**
